*Dear Sir/Madam ,*

*I am writing this to express my interest in the bachelors degree of mechatronics systems engineering offered at your prestigious university under the faculty of Technology and Bionics.*

*I have always had a keen undertaking with computers growing up. My father's career in IT opened me up to the world of computers at a young age. I would tinker with old machines, plug and unplug the electrical components until it worked. When I thought about what to study for my undergrad, I wanted to engage with computers the more, both on the electronic and software side while adding the mechanical discipline to it.*

*I believe I am a suitable candidate for this program given my academic achievements in physics, mathematics and information technology. I have no doubt that this is a course I would excel in, hoping to build a strong theoretical and practical foundation while acquiring industry experience during the course.*

*After my graduation , I desire to get more experience in the relevant industries and then move on to my masters degree. It would be a great opportunity to study in Germany at your esteemed institution. I hope for your favourable response. Thank you !*

*Your Sincerely*

*Billy Kipkorir Bett*
